Enable WIFI on Pi 3 using Command Line

1. **Scan WIFI networks**

   To scan WIFI networks use following command

   sudo iwlist wlan0 scan

   Locate your SSID (Your WIFI Name)

2. **Adding the network details to the raspberry pi**

   Open file /etc/wpa_supplicant/wpa_supplicant.conf with some editor of your own choice

   Append following lines at the end of the file

   ```
   network={
       ssid="Your WIFI network name"
       psk="Your_wifi_password"
   }
   ```

3. **Save the file and reboot your raspberry pi**

   *** Your Raspberry Pi has been connected ***
